

Ambient Spiral Coolers

The Unifreezing Ambient Spiral Coolers are especially designed for intensive and long-run, 24/7, production. Their size and capacity are custom made.

Best quality

In our Unifreezing Spiral Coolers we use only the most high-quality components. Because of this we guarantee you a trouble-free production

Hygienic design

Our cooler is designed from fully stainless steel, all seams are fully welded. The open structure ensures you that our cooler meets the highest standards of hygiene.

Intelligent controls

Unifreezing Ambient Coolers warrants optimal cooling time after the products have left the oven. Our Ambient Coolers are standard equipped with an intelligent Siematic PLC which controls fully automatically during the whole cooling process. This system assures you, as our client, the best efficiency.

Short installation time

Our machines are designed to minimize the installation time on site. The cooler is easy to disconnect, re-locate and re-connect.
All devices will be tested on site after installation as a service and Unifreezing takes care of training your staff to obtain a smooth start to produce.
