

Unifreezing IQF Tunnel Freezer

Meets highest hygienic requirements

- Stainless steel construction, except for motors, drives and food grade plastics
- Evaporators and fans: stainless steel
- Open construction, which allows easy maintenance and cleaning
- Optional: seams of insulation walls can be fully welded, no silicone. Can be placed in open air.
- Meets global food safety standards, NVKL certificate

Better product quality

- Vertical airflow, which is ideal for almost every product
- The airflow and air pressure can be controlled and adjusted
- Minimal shrinkage, low snow and ice formation on product surface
- Long run production without defrosting is guaranteed, 24 hours non-stop production

Strong points

- Custom-made
- Short installation time (few days)
- Self-supporting bottom. No special concrete floor necessary at location. Easy to remove
- Can be delivered as a ready-to-install unit, if suitable for road transportation
- More than 20 year experience in food machinery production & engineering

Final result

- Warranty on construction: 2 years
- Warranty on evaporators and fans: 1 year
- Maintenance: only once a year inspection by Unifreezing
- Your products are separately frozen, -18 degrees in the core and have kept their original color
- Ready for export to any country!
